

2018 ASC Hot Topics

HOT TOPIC SESSION: “#SoMe 2.0 – Building an Academic Career in the World of Social Media”

MODERATOR: Niraj Gusani, MD, MS & Christian Jones, MD

SPEAKERS: Justin Dimick, MD, MPH, Amalia Cochran, MD, Joseph V. Sakran, MD, MPA, MPH, Jamie Coleman, MD, Deanna Attai, MD, & Thomas K. Varghese, Jr. MD, MS

Social media has revolutionized the way we network and engage with the public. This Hot Topic will focus on how social media can be used in your academic careers, with illustrative examples in Digital Scholarship, Surgical Education, Public Health Initiatives in the Trauma Surgery, Cancer Awareness, and Future Trends in Social Media Platforms.

- Introduction – Niraj Gusani, MD, MS
- The Science of Digital Scholarship – Justin Dimick, MD, MPH
- Social Media and the Science of Education – Amalia Cochran, MD
- Engaging the Public in Areas of Debate – Joseph V. Sakran, MD, MPA, MPH
- Public Health Initiatives in Trauma Surgery – Jamie Coleman, MD
- Social Media and the Science of Cancer – Deanna Attai, MD
- SoMe in Surgery – what is the future? – Thomas K. Varghese Jr., MD, MS
- Roundtable Discussion/Debate – Moderated by Christian Jones, MD
- Question and Answers – All Speakers

LEARNING OBJECTIVES

At the conclusion of this session, participants will be able to:

- Understand the basic concepts of digital scholarship, including novel techniques such as the visual abstract that influence “impact factor” in advancing science.
- Assess the changing paradigms in Surgical Education, and how one can utilize Social Media in the constructs of curriculum development and simulation research.
- Recognize the barriers in engaging the Public at large on advocating for surgical issues, such as Trauma and Cancer, and how engaging with patients, providers and policy makers can be done in an academic career.
- Describe future trends in Social Media and their impact on the field of Surgery.

HOT TOPIC LUNCH SESSION 2: GRAND BALLROOM 6-8 “Integrated Residencies and Early Specialization Programs: A Threat to General Surgery Training or Innovative Approaches to Surgical Education?”

SESSION CHAIRS & MODERATORS: Brigitte K. Smith, MD & Jacob A. Greenberg, MD, EdM

SPEAKERS: Mary E. Klingensmith, MD, John E. Rectenwald, MD, Jennifer N. Choi, MD, Malachi Sheahan, MD, Thomas K. Varghese Jr., MD, MS, & Douglas S. Smink, MD, MPH

At this Hot Topic Session, surgical education leaders in Vascular and Cardiothoracic Surgery will debate with General Surgery leaders on key issues related to restructuring graduate surgical training, the merits of the integrated and early specialization programs, and the impact of these paradigms on general surgery training. Following the debates, attendees will have the opportunity to participate in a panel question and answer session.

- Introduction – Brigitte K. Smith, MD & Jacob A. Greenberg, MD, EdM
- Changing paradigms in graduate surgical education, past, present and future: update from the ABS – Mary E. Klingensmith, MD
- Sweeping changes to long-standing training models: Why and How VS and CTS implemented Integrated and ESP programs – John E. Rectenwald, MD

- The Lived Experience: How Should Interactions between General Surgery and Vascular and Cardiothoracic Surgery Training Programs be Managed?: General Surgery Perspective – Jennifer N. Choi, MD
- The Lived Experience: How Should Interactions between General Surgery and Vascular and Cardiothoracic Surgery Training Programs be Managed?: VS/CTS Perspective – Malachi Sheahan, MD
- Question and Answers – Brigitte K. Smith, MD & Jacob A. Greenberg, MD, EdM
- The Future of Graduate Surgical Education: What is the Optimal Training Paradigm?: VS/CTS Perspective – Thomas K. Varghese, Jr., MD, MS
- The Future of Graduate Surgical Education: What is the Optimal Training Paradigm?: General Surgery Perspective – Douglas S. Smink, MD, MPH
- Question and Answers – Brigitte K. Smith, MD & Jacob A. Greenberg, MD, EdM

LEARNING OBJECTIVES

At the conclusion of this session, participants will be able to:

- Discuss the history of efforts to re-structure graduate surgical training, barriers that have impacted the implementation of proposed changes in the past, and current and future trends.
- Understand why and how Vascular Surgery and Cardiothoracic Surgery created integrated and ESP training programs, including unique features of these specialties that may have impacted their ability to make these changes.
- Explain the impact of the VS and CTS Integrated and ESP programs on GS residency programs and trainees, both positive and negative, including strategies to manage negative impacts.
- Discuss how these training models could inform the future of GS training.

HOT TOPIC SESSION: *“Making Research Feasible for Busy Surgeons Through Infrastructure Support: Pros, Cons, and Lessons Learned the Hard Way”*

MODERATORS: Scott A. LeMaire, MD & Barbara W. Trautner, MD, PhD SPEAKERS: Timothy R. Billiar, MD, Mary Hawn, MD, Melina R. Kibbe, MD, FAHA, & Barbara W. Trautner, MD, PhD

This session is designed for anyone interested in increasing surgical participation in research, including their own participation. Leaders of four academic surgical programs will present examples of how they provided departmental-wide support for surgical research, followed by a panel discussion.

- Introduction – Barbara W. Trautner, MD, PhD
- Creating a Culture that Supports and Values Research – Melina R. Kibbe, MD, FAHA
- Creating an Educational and Training Resource of Housestaff and Young Faculty – Timothy R. Billiar, MD
- Establishing a Surgical Health Services Research Center – Mary Hawn, MD
- Building Infrastructure for Research Support – Barbara W. Trautner, MD, PhD
- Panel Discussion – All Speakers

LEARNING OBJECTIVES

At the conclusion of this session, participants will be able to:

- Engage in strategic thinking about what resources are needed to support surgical research.
- Appreciate the diversity of approaches that can meet surgeons’ research support needs.
- Understand some of the challenges to building research infrastructure in a surgical department.
- Know how to conduct a planning meeting in which departmental research support staff assist faculty members in launching an industry-sponsored clinical trial.

2017 ASC Hot Topics

HOT TOPICS SESSION: “Global Surgery: Just a Hobby or a Viable Academic Career Path?”

SESSION CHAIRS & MODERATORS: Benedict C. Nwomeh, MD and Sudha Jayaraman, MD, MSc

- Principles of Academic Global Surgery: How Can Mission Trip Actually be Anything Academic? – Fiemu Nwariaku, MD
- Surgical Training and the Bidirectional Benefits of International Surgery Rotations for Both Visiting US Trainees and Hosting International Trainees – Marissa Boeck, MD, Sam South, MD, and Selma Siddigui, MD
- Advocacy as a Surgeon and the Role of #REVERSEMENTORING – Issy Marks, Varshini Cherukupalli, and Waruguru Wanjau
- Building a Successful Academic Global Surgery Program – Ray Price, MD
- Recruiting an Academic Global Surgeon: Institutional ROI – Sudha Jayaraman, MD, MSc
- Getting Promoted as an Academic Global Surgeon – Sanjay Krishnaswami, MD
- Panel Discussion and Q&A – All Faculty

Attendees will hear surgeons who are leaders in academic #globalsurgery discuss pathways to success in the new field. A unique aspect of this session is the presentation by medical students and residents discussing their role in #reversementoring of their mentors.

LEARNING OBJECTIVES

At the conclusion of this session, participants will be able to:

- Understand how academic global surgery fits the 4 cardinal areas of academics: education, research, development, and advocacy
- Identify the role of international rotations as a part of academic surgical training to improve deficiency identified by residents and program directors.
- Identify ways for surgeons to improve communication and dissemination in the realm of Global Health
- Prepare to develop a global surgery program in your surgery department and to succeed as an academic global surgeon

HOT TOPICS SESSION: “Industry-Academic Innovation Partnerships: Where is the Pendulum?”

SESSION CHAIR & MODERATOR: Mark S. Cohen MD

Introduction to Session – Mark S. Cohen, MD

- Developing the First Surgery Department Certified Research Organization for Improved Industry Engagement – Michael W. Mulholland, MD, PhD
- The University-Industry Demonstration Partnership (UIDP) and Its Role in Educating Physicians Who Want to Engage with Industry – Anthony Boccanfuso, PhD, Executive Director, UIDP
- How Industry is Engaging in Improved Academic-Industry Partnerships – Bruce Gingles, Vice President, Global Technology Assessment & Health Policy, Cook Medical & Christine Mauro, MD, MMSc, Director of Medical Affairs, Medtronic
- Institutional Approaches to Industry Engagement (East to West) – Ronald Tompkins, MD, ScD & Hamin Lee, MD, PhD

Panel with 6 Case Discussions

1. Researcher Seeking Additional Funding
2. Resident Inventor
3. Program Director Educator Seeks Resources

4. Medical Student Innovator
5. Developing CME Program
6. Industry Reaching Out to Academia

This session is for all surgery faculty, residents, and medical students who want to develop a better understanding of how to engage their innovative ideas with industry partners and how academic-industry relationships can be fostered in today's surgical culture.

LEARNING OBJECTIVES

At the conclusion of this session, participants will be able to:

- Articulate the Sunshine Laws and how they came into being as well as current interaction policies
- Evaluate methods academic surgeons and trainees can approach industry for new surgical innovations including contracts, partnerships, grants, and collaborations for trials
- Evaluate how to advance Industry-Academic partnerships through education and the University-Industry Demonstration Partnership (UIDP) and how the pendulum is moving back toward collaboration.

HOT TOPICS SESSION: "Surgeon Workplace Injury: The Unspoken Experience"

SESSION CHAIRS: KMarie Reid, MD, MS and Valerie Lemaine, MD

MODERATOR: KMarie Reid, MD, MS

- Framing the Topic – KMarie Reid, MD, MS
- Workplace Injury: Who, Where, Why – Ramon Berguer, MD
- Interventions to Avoid Injury: What Does the Research Show – Susan Hallbeck, PhD
- Disability Insurance: Don't Wait Till It's Too Late – Blake Woodard, Woodard Insurance, LLP
- Discussion and Q&A – All Faculty

Increasingly our profession is coming to terms with the often undiscussed toll on our minds and body. While burnout is manifested mentally it can also manifest physically with overuse injuries (cervical spine 38%, musculoskeletal fatigue 36%, hand/forearm 20%). We are all at risk. Practicing surgeons and trainees need attend.

LEARNING OBJECTIVES

At the conclusion of this session, participants will be able to:

- Illustrate the most common workforce injuries experienced by surgeons and risk factors for injury.
- Demonstrate ideal ergonomics in the operating room and office and how to reduce the risk of injury.
 - Recommend steps to protect your career from the repercussions of injury.

2016 ASC Hot Topics

HOT TOPICS SESSION: “The Academic Medical Center of the Future: Transition from a Department-Oriented Infrastructure to a Multidisciplinary Disease-Specific Approach”

MODERATORS: W. Scott Melvin, MD & Peter Muscarella, MD

SPEAKERS: Marwan S. Abouljoud, MD, E. Christopher Ellison, MD, R. Matthew Walsh, MD, Darwin Conwell, MD, MS, & Robert E. Michler, MD

INTRODUCTION: W. Scott Melvin, MD & Peter Muscarella, MD

- Departments, Centers, Institutes, and Service Lines: “What does it all mean?” – Marwan S. Abouljoud, MD
- Academic Departments of Surgery: A Historical Perspective – E. Christopher Ellison, MD
- Multidisciplinary Institutes: Patient-Centered Care Model – R. Matthew Walsh, MD
- Pancreas Centers of Excellence as a Model for Multidisciplinary Collaboration: A Non-Surgeon Point of View – Darwin Conwell, MD, MS
- The Role of the Department of Surgery in the Academic Medical Center of the Future – Robert E. Michler, MD
- Panel Discussion/Questions

LEARNING OBJECTIVES

At the conclusion of this session, participants will be able to:

- Review the structure and history of academic departments of surgery with emphasis on the benefits of this model.
- Define the various terms used when referring to multidisciplinary centers for patient care.
- Review the rationale for, and structure of, various models for patient-centered health care delivery.
- Infer on the structure of academic surgical centers of the future and how surgeons of today can influence their development.

HOT TOPICS SESSION: “High-Risk Surgery Under Emerging Payment Mechanisms: What Do Accountable Care Organizations, Bundled Payments, And Global Budgets Imply For The Future Of Surgery?”

MODERATOR: Lauren Hersch Nicholas, PhD, MPP

SPEAKERS: Jim Dupree, MD, MPH & Thomas Tsai, MD, MPH

- Overview of Session – Lauren Hersch Nicholas, PhD
- Accountable Care Organizations – Jim DuPree, MD
- Bundled Payments – Thomsas Tsai, MD, MPH
- Global Budgeting – Speaker TBD
- Audience Question and Answer

LEARNING OBJECTIVES

At the conclusion of this session, participants will be able to:

- Compare the incentives under current surgical reimbursement strategies with those represented by accountable care organizations, bundled payments, and global budgeting.
- Predict potential effects of alternative reimbursement schemes on surgical revenue and quality of care.
- Develop strategies for maintaining and improving quality of care in a challenging financial environment.

HOT TOPICS SESSION: “The Role of Professional Coaching in Developing Emotional Intelligence and Preventing Burnout in Surgery”

SPEAKERS: Taylor S. Riall, MD, PhD & Tambre Leighn, MA, CPC, PCC, ELI-MP

- The Challenges We Face in Academic Surgery
- The Statistics on Burnout Among Surgeons
- The Role of Professional Coaching in Recovering from and Preventing Burnout
- A Unique Coaching Model That Helps Create Mindfulness, Emotional Intelligence, and Wellbeing
- Live Coaching Demonstrations/Practical Application of These Tools
- Question and Answer Period

LEARNING OBJECTIVES:

At the conclusion of this session, participants will be able to:

- Discuss the challenges in academic surgery that contribute to burnout.
- Define emotional intelligence, mindfulness, and wellbeing.
- Understand tools that professional coaches use to help individual’s increase self-awareness.
- Understand the role of the Energy Leadership model in developing mindfulness and emotional intelligence.
- Discover that:
 - They can be at the cause and not the effect of their lives.
 - Every day, in every situation, they have a choice.
 - They can consciously respond rather than react to their environment.

2015 ASC Hot Topics

“WHEN DO QUALITY IMPROVEMENT (QI) STUDIES TRANSITION INTO HUMAN SUBJECTS RESEARCH (HSR)? WHAT IS THE ROLE OF IRB APPROVAL FOR QI WORK?”

MODERATOR: Mehul Raval, MD, MS

PANELISTS: Melina Kibbe, MD, Peter Angelos, MD, Clifford Y. Ko, MD, John F. Sweeney, MD, & Monica Lopez, MD

JUNIOR FACULTY DEBATE LEADERS: Joseph Sakran, MD, MPH & Stephanie Nitzschke, MD

LEARNING OBJECTIVES

At the conclusion of this session, participants will be able to:

- Clearly define QI and HSR.
- Review ethical principles that must be adhered to as QI transitions into HSR.
- Define the role of the IRB in QI.
- Determine when editors will require review of QI projects for publication.
- Provide an algorithm to navigate the distinction between QI and HSR.

“EXPLORING THE ROI OUTSIDE OF R01S”

MODERATORS: Niraj Gusani, MD, MS & Sandra Wong, MD

SPEAKERS: Amalia Cochran MD, Ben Nwomeh, MD, Tomer Davidov, MD, Tom Varghese, MD, Sam Finlayson MD, MPH & Jeff Matthews, MD

LEARNING OBJECTIVES

At the conclusion of this session, participants will be able to:

- Describe and understand traditional (R01-funded basic/translational/clinical research) and emerging paths in academic surgery.
- Describe the study of surgical education, including curriculum development and research on simulation.
- Understand how to move beyond mission trips (service) to an academic career focused on the study of global surgery.
- Describe how innovation and invention leads to scientific advancement and a viable career in academic surgery.
- Understand ways to define and measure the academic “impact factor” of advancing technology (e.g., as platforms for information dissemination), and to describe ways to integrate an eQective presence on social media into an academic career.
- Review ways that “alternative” academic pursuits add value to a department’s academic portfolio, and to review ways to make these academic pursuits a part of a surgeon’s promotion and tenure package.

“FUNDING FOR GME IN AMCS - A PROPOSED MODEL FOR THE EVOLVING HEALTH CARE ENVIRONMENT”

MODERATORS: Chandrakanth Are, MBBS, FRCS & David W. Mercer, MD, FACS

SPEAKERS: Jeffrey P. Gold, MD, William Dinsmoor, MD, Michael Wadman, MD & Chandrakanth Are, MBBS, FRCS

LEARNING OBJECTIVES:

At the conclusion of this session, participants will be able to:

- Develop an understanding of the current status of funding for graduate medical education.
- Recognize issues associated with maintaining sustainable funding streams for graduate medical education.
- Be appraised of what the future holds for funding of graduate medical education
- Compare and apply the novel funding model for graduate medical education at their campus.

2014 ASC Hot Topics

HOT TOPIC SESSION: “PUTTING YOUR BEST FOOT FORWARD: PROFESSIONAL ADVANCEMENT THROUGH PERSONAL DEVELOPMENT”

Moderators: Jennifer F. Tseng, MD, MPH and Sandra Wong, MD, MPH

- Introduction Jennifer F. Tseng, MD, MPH and Sandra Wong, MD, MPH
- Meet the Press: Media Training and Improving Your Presentation Style Rhonda Mann, MD
- Social Media 101 Niraj Gusani, MD
- Audience Participation Jennifer F. Tseng, MD, MPH and Sandra Wong, MD, MPH

At the end of the session, participants will be able to:

1. Better understand how to interact with reporters (press releases and interviews);
2. Understand the importance and content of different presentation styles (including how to develop “elevator speeches”);
3. Learn the importance of a social media presence;
4. Understand how to establish and maintain an effective professional presence on various social media platforms (e.g., Twitter, blogs).

HOT TOPIC SESSION: “RVU-ONOMICS: HOW THE INCENTIVES AND DISINCENTIVES OF RELATIVE VALUE UNITS IMPACT A CAREER IN ACADEMIC SURGERY”

Moderator: Robert Canter, MD

- RVUs and Measuring Productivity: Steven Chen, MD, MBA
- How Did We Get to this Point and Where Do We Go From Here?
- The Business Side of Medicine: RVUs and More Kiran K. Turaga, MD, MPH
 - RVUs/DRGs and the Bottom Line: Michael F. Rotondo, MD, FACS

How do RVUs and DRGs Impact Hospital Budgets

- How Do RVU’s Impact Departmental Budgets? David Wisner, MD

At the end of this session, participants will be able to:

1. Understand the how’s and why’s of RVUs, work RVUs, DRGs, departmental and hospital budgets;
2. Understand how RVUs do and do not impact the “bottom line” of departmental and hospital budgets;
3. Understand how RVUs do and do not reflect the “productivity” of academic surgeons;
4. Discuss how these issues affect the current and future careers of academic surgeons.

HOT TOPIC SESSION: “SBAS SPONSORED POLICY DEBATES: OBAMACARE AND GUN CONTROL LAWS”

Moderator: Adil Haider, MD

(1) Obamacare - Will It Help Eradicate Healthcare Disparities OR Further Worsen Them?

- Pro: Yes It Will Decrease Disparities In Health Care Rachel Kelz , MD
- Con: No It Will Worsen Access And Actually Harm Patients Karl Y. Bilimoria, MD
- Rebuttals
- Questions and Vote

(2) Proposed Gun Control Laws: Will They Actually Decrease The Number of Trauma Patients We See?

- Con: No, We Have Had Plenty of Laws and None of Them Jeffrey S. Upperman, MD
- Have Decreased Violence
- Pro: We Need These Laws to Decrease the Number of Trauma Patients We Have To Pronounce Dead Ali Salim, MD
 - Rebuttals
 - Questions and Vote

At the end of this session, participants will be able to:

1. Understand the current provisions in Obamacare that are designed to enhance access to health care including surgical care;
2. Understand how Obamacare may in fact limit impact access to surgeons and the potential advantages and disadvantages it associated with the current version of this law;
3. Identify opportunities for surgeons to become involved in the roll out and further modification of the new health care law;
4. Understand the current gun control laws at the federal level and proposed laws regarding: magazine sizes, gun types and gun sales;
5. Understand data and research emanating from previously enacted legislation designed to decrease violence and injuries that surgeons across the country are called upon to treat;
6. Develop a knowledge of opportunities for Surgeons to get involved in the political process, especially at the state level and discuss impact of community involvement by surgeons in the past.

2013 ASC Hot Topics

HOT TOPIC SYMPOSIUM: “ACUTE CARE SURGERY – NOW THAT WE’VE BUILT IT, WILL THEY COME AND WHY SHOULD THEY?”

Moderator: Thomas Esposito, MD

- Why was it built? Overview of the evolution of this new discipline. Thomas Esposito, MD
- What is it? Overview of the Acute Care Surgery Fellowship Curriculum and status of fellowships nationally. Thomas Esposito, MD
- Who might consider it and why? Presentation of results of published opinion surveys of residents and attendings on Acute Care Surgery Fellowships and other training issues. Jamie Jones, MD
- Why consider it and what can you do with it? Discussion of different practice models of Acute Care Surgery and testimonials from those who have finished the Fellowship and are now practicing. David Efron, MD & Paula Ferrada, MD

At the end of the session, participants will be able to:

1. Be familiar with issues that led to the development of Acute Care Surgery and the argument for its need.
2. Be familiar with the current content of the Acute Care Surgery Fellowship curriculum and the status of Fellowships.
3. Be familiar with the opinions of current surgical residents and attendings on Acute Care Surgery.
4. Be familiar with the current practice models of Acute Care Surgery and the benefits it offers as a career.

HOT TOPIC SESSION: “SURGICAL OUTCOMES DATA: THE NEXT FRONTIER IN SURGICAL EDUCATION”

Moderator: Rachel Kelz, MD

- The Academic Report Card: How Do We Measure Up and How Do Residents Affect These Results? Justin B. Dimick, MD, MPH
- A Brave New World in Surgical Education: How Can Outcomes Data Help with the Core Competencies and the Milestones Project? James Hebert, MD
- Building a Culture of Commitment: The Next Generation of Surgeons Clifford Ko, MD
- Let the Data Speak to Your Residents Rachel Kelz, MD

At the end of the session, participants will be able to:

1. Understand currently available data used to assess surgical quality.
2. Describe the state of patient care in academic centers considering issues related to surgical education and resident participation.
3. Illustrate recent changes in accreditation requirements and external pressures motivating change in the surgical training paradigm.
4. Develop strategies to integrate outcomes data into surgical education.

HOT TOPIC SESSION: “BLEEDING IN THE OPERATING ROOM – WHY IT’S BAD AND HOW TO STOP IT!”

Does Intraoperative Blood Transfusion Help? What is the evidence? Victor Ferraris, MD

- Bleeding in Cardiac Surgery: Lessons Learned and Translation to Elective and Emergency Surgery Todd Rosengart, MD
- Bleeding in the Setting of Trauma: Lessons in Surgical Hemostasis from the Wars in Afghanistan and Iraq Lt. Col. Gerald R. Fortuna, MD, USAF, MC
- Bleeding in the Setting of Trauma: Lessons in Hemostatic Resuscitation from the Wars in Afghanistan and Iraq Lt. Col. Jeremy W. Cannon, MD, USAF, MC

- Management of Bleeding in the Non-Surgical, Non-Trauma Patient: A Transfusion Medicine Perspective Lawrence (Tim) Goodnough, MD

At the end of this session, participants will be able to:

1. Identify clinical factors placing patients at high risk for perioperative bleeding.
2. Gain comfort in the multi-modality approach to blood conservation that broadens the focus from limiting blood transfusion to a more comprehensive strategy that includes maintaining adequate hemoglobin concentration, optimizing hemostasis, and minimizing blood loss in order to limit transfusion.
3. Understand the differences in transfusion strategies in civilian and military trauma compared to elective or semi-elective operations.
4. Understand options for handling massive transfusion and treatment of intractable bleeding in the civilian and military settings.
5. Learn the value of a multidisciplinary approach to management of blood resources, especially as it relates to uncontrolled bleeding.

HOT TOPIC SESSION: “GLOBAL HEALTH AND ACADEMIC SURGERY: PRACTICAL PERSPECTIVES”

Moderators: Chandra Are, MD & Purvi Parikh, MD

- Resident’s Perspective (Clinical Aspects) Paul Kolkman, MD
- Resident’s Perspective (Research Aspects) Megan Frost, MD
- Junior Faculty’s Perspective Randeep Jawa, MD
- Senior Faculty’s Perspective Ray Price, MD
- Program Director’s Perspective Chandra Are, MD

At the end of this session, participants will be able to:

1. Provide practical perspectives and knowledge on global surgical healthcare, as part of surgical educational curricula and as volunteer or outreach work for the academic surgical community.
2. Provide a rationale for the involvement of the academic surgical community in these global health endeavors.
3. Outline methods to develop surgical capacity in the third world in which the academic surgical community can play a vital and much needed role.
4. Delineate the clinical and research avenues where the involvement of the academic surgical community can be beneficial.

2012 ASC Hot Topics

HOT TOPIC SYMPOSIUM: “A NEW BEGINNING OR THE BEGINNING OF THE END? SURGERY IN THE ELDERLY AND PATIENTS NEAR THE END OF LIFE”

Moderator: Zara Cooper, MD

- If They Can't Walk Into Your Office, They Probably Won't Dance Out Either Thomas Robinson, MD
- I Never Would Have Operated If I Knew They Were Going to Give Up So Soon... Margaret L. Schwarze, MD
- It Is Always Too Early Until It's Too Late: The Delicate Balance Between Cure and Comfort Anne C. Mosenthal, MD

At the end of this session, participants will be able to:

1. Understand the impact of frailty on surgical morbidity and mortality in elderly patients.
2. Reflect on the unique challenges posed by advance directives in surgical patients.
3. Understand how integrating the principles of palliative medicine with surgical treatment can improve care for patients at the end of life.

HOT TOPIC SESSION: “MINIMALLY INVASIVE SURGERY – LAPARO-ENDOSCOPIC SINGLE SITE (LESS) SURGERY: A STATE-OF-THE-ART UPDATE”

Moderator: Sharona Ross, MD

- LESS Foregut Surgery Sharona Ross, MD
- LESS Bariatric Surgery Ninh T. Nguyen, MD
- LESS Colorectal Surgery Todd Wilson, MD
- LESS Training and Certification Alexander Rosemurgy, MD

At the end of this session, participants will be able to:

1. Introduce new emerging technology for foregut and colorectal surgery and understand this new surgical technique.
2. Describe patient selection criteria and their impact on clinical outcomes.
3. Identify potential benefits, risks, and challenges of LESS foregut, bariatric, and colorectal surgery.
4. Describe appropriate access methods and toolbox such as multi-trocar ports, instruments, and optics.
5. Implement changes and improvements in surgical practice based on clinical evidence and case studies.
6. Gain information regarding training and certification for LESS surgery.

2011 ASC Hot Topics

HOT TOPIC SYMPOSIUM: TISSUE-BASED INDIVIDUALIZED CANCER CARE: FROM PROMISES TO PRACTICE

Moderators: John C. Mansour, MD and Roderich E. Schwarz, MD, PhD

The age of genomic signatures, preomic profiling, high throughput information systems, and powerful statistical analysis has introduced opportunities for predicting the behavior of individual tumors.

Without surgical involvement in the discovery process, these advances will be impossible. Surgeons must participate in the collection of tissue for analysis, the basic science research investigating biologically relevant questions, the design of relevant pre and postoperative trials, and the identification of patients in need of trial-based therapy.

11:30 AM - 11:40 AM An Introduction to the Challenges of Molecularly-Based Personalized Cancer Care John C. Mansour, MD

11:40 AM - 12:00 PM Biobanking and Tissue Repositories William E. Grizzle, MD, PhD

12:00 PM - 12:20 PM A Randomized Trial Employing Molecular Individualization Laura J. Esserman, MD

12:20 PM - 12:40 PM Taking Molecular Individualization from the Bench to Industry to the Clinics Mark Lee, MD, PhD

12:40 PM - 1:00 PM Panel Discussion All Panelists

At the conclusion of this session, participants will be able to:

1. Define what is currently known about standards for tissue handling, tumor profiling techniques, and study design.
2. Define the opportunities for novel research relevant to the unique questions raised by individualized cancer therapy research.
3. Examine the current leading edge of the clinical trials incorporating tissue-based personalization using examples of currently accruing protocols.

HOT TOPIC SYMPOSIUM: CURBSIDE VASCULAR CONSULT, ANSWERS TO COMMONLY ASKED QUESTIONS

Moderator: Jason M. Johanning, MD

The purpose of the Vascular Hot Topic session is to provide the audience with commonly encountered clinical scenarios for which Vascular Surgeons are commonly asked to comment on during the course of hospitalization. The goal of the session is to present a distinct clinical entity and provide a clear and concise picture current treatment approach as based upon current evidence. The rapid fire presentation approach was chosen to allow for presentation of multiple scenarios.

11:30 am - 11:40 am Should We Treat Tibial DVT? Peter K. Henke, MD

11:40 am - 11:50 am Should We Remove that Vena Cava Filter? John A. Curci, MD

11:50 am - 12:00 pm My Patient Has Heparin Induced Thrombocytopenia, What Do I Do Now? Panagiotis Kougiaris, MD

12:00 pm - 12:10 pm How Long Should I Wait to Operate on a Patient after a Coronary Stent? Alan Dardik, MD, PhD

12:10 pm - 12:20 pm Is Endovascular Repair Now the Gold Standard for Traumatic Aortic Transection? Iraklis I. Pipinos, MD

12:20 pm - 12:30 pm Should I Use Ultrasound of Central Venous Access? Jason M. Johanning, MD

12:30 pm - 12:40 pm My Patient Has a Significant Carotoid Stenosis and Needs a Major Operation: Operate, Stent or Do Nothing? Peter R. Nelson, MD

12:40 pm - 12:50 pm What is the Best Study for My Patient...CTA/MRA/Anigography? Gale L. Tang, MD

12:50 pm - 1:00 pm Q&A All Panelists

At the conclusion of this session, participants will be able to:

1. Define what is currently known about standards for tissue handling, tumor profiling techniques, and study design.
2. Define the opportunities for novel research relevant to the unique questions raised by individualized cancer therapy research.
3. Examine the current leading edge of the clinical trials incorporating tissue-based personalization using examples of currently accruing protocols.

HOT TOPIC SYMPOSIUM: DEVELOPMENT OF BIOTECHNOLOGY AND MEDICAL DEVICES

Moderator: George P. Yang, MD

As physician-scientists, academic surgeons are involved in the process of performing basic and clinical research with the goal of improving patient care. Part of the process of translation is the actual process of creating a product, securing intellectual property, obtaining funding, and performing the testing required to get the product to the market. This session will address the basic steps and approaches to commercialization.

Speakers: Mitchell Fink, MD, Geoffrey C. Gurtner, MD, Kris Kieswetter, PhD, and Matthew Pollman, MD

At the conclusion of this session, participants will be able to:

1. Conceive of products based upon your research and clinical practice.
2. Create a business model and attract initial rounds of financing to further develop the product.
3. Determine what ideas are worth supporting.
4. Determine the factors involved in obtaining FDA approval for new products.

HOT TOPIC SYMPOSIUM: ROBOTIC ASSISTED MINIMALLY INVASIVE SURGERY

Moderators: A. James Moser, MD and Herbert J. Zeh, MD, PhD

12:00 pm - 12:15 pm Robotic Approaches to Thoracic Disease Bernard J. Park, MD

12:15 pm - 12:30 pm Results of Robotic Assisted Complex Pancreatic Hepatobiliary Procedures A. James Moser, MD

12:30 pm - 12:45 pm Robotic Assisted Liver Resection Alan Tsung, MD

12:45 pm - 1:00 pm Single Port Robotic Assisted Surgery: Future is Now Sri C. Chalikonda, MD

1:00 pm - 1:15 pm Endoluminal Robotics: A Glimpse at the Future Juliane Bingener-Casey, MD

1:15 pm - 1:30 pm Virtual Robotic Training Devices Myriam Curet, MD

At the conclusion of this session, participants will be able to:

1. Define the indications for Robotic Assisted approaches to thoracic diseases.
2. Understand short term and long-term outcomes in robotic assisted thoracic surgery.
3. Describe robotic approach to complex gastrointestinal surgical procedures.
4. Discuss short term and long-term outcomes in robotic assisted complex gastrointestinal surgery.
5. Describe and understand the principles behind single port robotic platform.
6. Understand the current limitations to robotic assisted surgery and discuss future potential applications of robotic assisted surgery.

2010 ASC Hot Topics

HOT TOPIC SYMPOSIUM: CLINICAL TRIALS AND ACADEMIC CAREER DEVELOPMENT: THE ACOSOG EXPERIENCE

Introduction Tara M. Breslin, MD

Correlate When You Inoculate: The Importance of Incorporating Laboratory

Based Studies in the Design of a Breast Cancer Vaccine Trial Elizabeth A. Mittendorf, MD

Extending the Value of ACOSOG Clinical Trials: Funding Opportunities for Correlative Studies John A. Olson, Jr., MD, PhD

Developing Your Academic Career Through a Clinical Trial: Z9001 Experience David M. Ota, MD

Objectives: At the conclusion of this session, participants will be able to:

- To understand how to develop a clinical trial with a correlative science investigations.
- To understand how a clinical trial can lead to peer-reviewed funding.

HOT TOPIC SYMPOSIUM: CURRENT CONCEPTS IN THE PREVENTION OF SURGICAL SITE INFECTIONS (SSIs)

Moderator: Walter L. Biffi, MD

Surgical Site Infections and the Surgical Care Improvement Project Donald E. Fry, MD

Surgical Site Infections and Their Prevention William G. Cheadle, MD

Surgical Site Infection in Colorectal Surgery - What's New? Kamal F. Itani, MD

Objectives: At the conclusion of this session, participants will be able to:

- Understand the basic concepts and definitions of SSIs.
- Recognize the impact of SSIs on patient outcomes and the impact on costs of care.
- Understand the evidence for preventive measures.

HOT TOPIC SYMPOSIUM: HERNIA –“EXPERT UPDATE: COMPONENT SEPARATION: WHAT’S NEW”

Moderators: Attila Nakeeb, MD and C. Max Schmidt, MD, PhD, MBA

Anatomical and Patient Factors Should Dictate

Ventral Hernia Operative Approach, Technique and Reinforcement William A. Wooden, MD

Component Separation: Pros and Cons of Open Vs. Laparoscopic Mike J. Rosen, MD

Dynamic Abdominal Wall Reconstruction J. Scott Roth, MD

Component Separation: Autologous Tissue Transfer, Any Role In Biologic Era? Ron P. Silverman, MD

Panel Discussion All Panelists

OBJECTIVES: At the conclusion of this session, participants should be able to:

- Acquire general knowledge of abdominal wall anatomy and physiology as it relates to ventral hernia repair and component separation.
- Acquire general knowledge of indications for component separation in ventral hernia repair.
- Acquire general knowledge of open and minimally invasive techniques for ventral hernia repair and component separation.
- Acquire general knowledge of indications and use of synthetic, biologic and native tissue reinforcement for ventral hernia repair and component separation.

HOT TOPIC SYMPOSIUM: LIVER TUMORS –“EXPERT UPDATE: EMERGING APPROACHES TO PRIMARY AND SECONDARY MALIGNANCIES”

Moderators: Timothy M. Pawlik, MD, MPH

Colorectal Liver Metastasis: Defining the Role of Resection,

Local and Systemic Chemotherapy. Is There a New Paradigm of Care? Yuman Fong, MD
Making Decisions for the Patient With Hepatocellular Carcinoma: Resection, Transplantation, Intra-Arterial Therapy or Nexavar? Steve Curley, MD

Imaging the Liver:

Promising Novel Pre- and Intra-Operative Imaging Modalities David Geller, MD

Treating Primary and Secondary Hepatic Malignancies with

Radiofrequency or Microwave Ablation: Patient Selection and Outcomes Robert Martin, III, MD

Panel Discussion All Panelists

OBJECTIVES: At the conclusion of this session, participants should be able to:

- Define resectability criteria for colorectal liver metastasis.
- Present data on the role of pre-operative chemotherapy as neo-adjuvant and conversion therapy.
- Detail the short-term benefits and risks of chemotherapy for the surgical patient with colorectal liver metastasis.
- Present data on factors associated with peri-operative outcome following resection of hepatocellular carcinoma (MELD, HPVG, Child-Pugh-Turcotte score, etc).
- Present data on the relative morbidity and long-term outcome of transplantation, resection, or ablation for early hepatocellular carcinoma.
- Present data from the SHARP trial on sorafenib for advanced hepatocellular carcinoma.
- Discuss emerging novel pre- and intra-operative imaging modalities in liver surgery.
- Understand the role of ablative therapies in the management of patients with primary and secondary liver malignancies.
- Define the relative benefits of radiofrequency versus microwave ablation.
